DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-7 and 13-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Curley et al. (6,714,826).

As to claim 1, Curley teaches a method of processing a plurality of audio stream for presentation purpose, comprising the steps of:

Processing a first audio stream;

Buffering the processed primary/first audio stream

Processing a second audio stream independently; and

Storing the processed secondary audio streams with and/or without mixing it with the first audio stream (abstract; Fig.2. 5; Col.7, lines 40-65).

As to claims 2-3, Curley teaches where multiple tracks of audio streams are processed and a mixing operation (Fig.3).

As to claim 5-7, Curley teaches performing sampling rate conversion on the audio streams (Fig.3).

Claims 13-16 are analogous to the claims above and are rejected for the foregoing reasons by Curley et al.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 22-36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. the claimed limitation citing indicators having various appearances is not described in the specification.

Allowable Subject Matter

Claims 4, 8,9-11, 12, 17-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
